# Meeting with the Director of Education Resource Center

We were invited by the Director of the Education Resource Center (ERC), Hajiya Neemat D. Abdulrahim, for a meeting to discuss the success of the Walk for Education 2.0. campaign held last year. We also looked at possible areas of collaboration related to helping more out-of-school children, including Almajiri children, to get unhindered access to quality education. We are looking forward to what the next steps will look like for what appears to be an exciting partnership.

# International Day of Education: partnership with Sahel Consulting to enroll 20 out-of-school children back to school

We celebrated the International Day of Education with an enrollment event to send 20 out-of-school children back to school.

The event, which was organized in partnership with Sahel Consulting Agriculture and Nutrition Limited, is under the Foundation's Sustainable Education Program (SEP).

SEP promotes the concept of sustainability and empowers parents through climate-friendly initiatives, including climate-friendly agriculture, recycling, up-cycling, and other sustainable projects. At the end of the event, 20 out-of-school children were identified and 12 of them were successfully enrolled 12 into LEA Kado Bimko Primary School, Abuja.

# Visit to Kwali

Staying true to its mission to improve access to quality education for indigent children in Nigeria through innovative projects, the FlexiS-AF Foundation visited 4 rural communities in Kwali, a local government aread under Gwagwalada Area Council of the Federal Capital Territory.

These communities, namely Kilankwa 1, Kilankwa 2, Petti, and Old Chukuku, are known for having a high number of vulnerable households and Out-of-School Children (OOSC).

The Foundation team identified lack of funds, lack of sensitization, and lack of proximity to schools, as the main reasons for the alarming rate of OOSC in these communities.

The FlexiSAF Foundation plans to extend its reach to these communities and give the children of these communities the opportunity to reach their full potential through quality education.

## - The Story of Abbas.

Abbas is 11 years old. His father is late and his mother is blind. Abbas lost a few fingers on his right hand when he was younger. He then resorted to learning how to write with his left hand.

Abbas wants to be a Scientist when he grows up and he is already showing exceptional analytical skills.

Our AccLearn seasoned instructors identified Abbas' strongest intelligence to be "Mathematical/Logical Intelligence" based on the theory of Multiple Intelligence. He likes precision and enjoys abstract and structured thinking. He usually quantifies things at every slight opportunity.

# 2023 Annual Foundation Retreat

We had a blast at our 2023 Foundation retreat held on the 28th of January at our main office in Abuja!

It was great to have all our staff together in one room, including some of the Foundation's Trustees. The retreat served as a great opportunity for the FlexiSAF Foundation team to get to know each other better, reflect on the preceding year, and proffer suggestions on areas we can improve this year. Aside from reviewing the Foundation's performance, the team also engaged in fun exercises and energizers.

The FlexiSAF Foundation team remains committed to providing indigent children with access to quality education as a means to solve the scourge of illiteracy and alarming rate of out-of-school children in the country.
